3rd Party voice fix after Win10 Anniversary Update

The Win10 Anniversary update broke my third party Ivona voice. This short tutorial shows how you can fix it again.
Credit goes to Steve G for his excellent tutorial that got my voice working in the first place!

Last Updated: 10/26/2016

Step 1

If you have not yet set up your third party voice see Steve G's excellent tutorial here:
Tutorial On Fixing Voice Synthesis issue With Windows 8.1 and Windows 10.

Step 2

First of all you must make sure that you have closed EZ-Builder and any other apps using Speech Synthesis otherwise you will end up with an error when trying to rename folders later in the fix.
Navigate to:
C:\Windows\Speech_OneCore\Engines\TTS
and
Rename the folder
en-US
to:
en-US_Backup

Step 3

Restart EZ-Builder and select your third party voice again from the Synthesis settings
You should be good to go!
