Posting pictures in a Forum thread

Call it a pet peeve or just wanting help people post pictures in their forum threads with the correct orientation. This tutorial will help you prepare your pictures for uploading in to the forum threads. Everyone is making great looking robots, now lets make great looking threads!!!!

Last Updated: 6/28/2017

Opening picture from camera

Once you have your picture in your computer, right click on it and select - OPEN WITH then select PAINT

Editing the picture

Now that it is open in PAINT, you can do a lot of things to it. Correct the orientation, change the size and print something on it. The list goes on.

Save your picture

When you have finished editing your picture, give a name and save it in your computer.

Uploading your picture

To upload your picture, go to the ' Attach File ' and click on 'Choose File'. Select your picture and click 'Upload File'

Editing your picture in a forum post

If for some reason your picture doesn't look right in your post, click on the ' Edit ' button in that post and fix it by deleting it and then re-post it after you've fixed it up.
