My Current Dewy Drive Train Setup + Info

Ok. So.
People who might be unsure how they're supposed to connect h-bridges to the ez-b V4 will wanna check this one out for an idea.
I made this video to show people how my Dewy drivetrain is currently setup. If it helped anyone, let me know! If I was wrong at any point in the video leave a comment on it.
Thanks guys, And I hope it helps!
