synthiam.com

Richie Rich's Tutoral Index :)

NOTE: This topic is over a year old and was started when the EZ-B V3 was current. Some topics linked to and projects listed may be out of date. Always check the information is current. If in doubt, ask!
To make it easier, and to save from bookmarking a bunch of pages just bookmark this one, this is an index of all tutorials and related downloads
All complete and working with the exception of those noted (In Progress).
[b]Note: These are...

Last Updated: 6/3/2013

Step 1

NOTE: This topic is over a year old and was started when the EZ-B V3 was current. Some topics linked to and projects listed may be out of date. Always check the information is current. If in doubt, ask!
To make it easier, and to save from bookmarking a bunch of pages just bookmark this one, this is an index of all tutorials and related downloads
All complete and working with the exception of those noted (In Progress).
Note: These are in addition to the support tutorials and Lessons DJ and the EZ-Robot team have put together.
I will eventually add in **all** tutorials, for now its just mine and a few others that I have checked out but I need to check through the forum for others and confirm they are easy to understand and work.
This will be updated after any new tutorials are made, I also welcome any suggestions for future tutorials for any of the controls in EZ-Builder, EZ-Scripts or small electronic circuits, please just request in this topic and I'll see what I can do
So without further a-do...
