add more voices

add more voice to your projects

Last Updated: 2/25/2020

More voices

On your computer (windows 10), go to settings, then go to “time and language”, then “language” (+ add preferred language) (choose a language to install)

get audio modules

Get many new voices in the audio - “Speech Syntheses settings” voices
Add audio - AudioToolBox plugin

Open a script, add:

```
ControlCommand("AudioToolBox  Plugin", "ImportUWPVoices")
```

Add another script and then save

Then check your “Speech settings” voices – all the ones you added will be there
Add another script and then save

for this scrip:
your computer's audio
code: (you can say anything here) I just put:
Say("Hello to all, how are you")
sleep(50)
Say("I am fine")

get windows Mark voice

Mark voice https://www.trishtech.com/2016/12/enable-hidden-text-to-speech-voices-in-windows-10/

That is it, enjoy!
